

# Poppy Vest Right Side Charts

The following charts contain the design for the right side of the Poppy Vest.

Each square on the chart represents a single tent stitch over a thread crossing on the 12 count canvas. The squares are coded with symbols for each color. Note that inside the vest proper, an empty square indicates use of Bright White (Paternayan 216).

You should be able to stitch each side on an 18" by 30" piece of 12 mesh canvas. The center points are marked on the charts.

The general instructions including the color symbol definitions and the left side charts are in separate documents.
